Installation Guide

Bi-Folding Door

GENEL KURULUM TALİMATLARI

General Installation Instructions

Katlanır kapı kurulum işine başlamadan önce mutlaka bu montaj talimatlarını okuyun. Önerildiği gibi imalat ve montajı yapın. Aksi takdirde ürün düzgün çalışmayabilir.

Before starting the installation of the folding door, make sure to read these assembly instructions carefully. Follow the recommended manufacturing and installation procedures. Otherwise, the product may not function properly.

NİTELİKLER

Qualifications

Montaj talimatları, üretici bünyesinde çalışan Kapı ve Pencere imalatı ve montaj teknikleri konusunda eğitimli, Ustalık Belgesine sahip kalifiye elemanların dikkatine yöneliktir.

These assembly instructions are intended for skilled personnel who are trained in the manufacturing and installation techniques of doors and windows, and possess a Master Certificate.

NAKLİYE VE DEPOLAMA

Transport and Storage

Nakliye sırasında gevşeyebilecek parçalar zarar görebilir veya kazalara neden olabilir. Malzemelerin incelenmesi için açılan tüm ambalajlar, bir sonraki taşıma için düzgün bir şekilde kapatılmalı ve mühürlenmeli, güvenli ve sağlam bir şekilde yüklenmelidir.

Parts that may come loose during transportation can be damaged or cause accidents. All packaging opened for inspection purposes must be properly closed and sealed for further transportation, loaded safely and securely.

GELEN MALLAR

Incoming goods

Gelen ürünler araç içinden çıkarılmadan önce, herhangi bir zarar görüp görmediği kontrol edilmelidir. Teslim alınan malzemeler, irsaliye ile eşleşmelidir.

Before removing the incoming goods from the vehicle, they should be inspected for any damages. The received materials must match the delivery note.

MONTAJ YERİ İNCELEMESİ

Site Survey

Montaja başlamadan önce, saha koşulları kontrol edilmelidir. Ürün montajı yapılacak yapı boşluğundaki belirgin kusur ve eksiklikler kontrol edilmelidir. Eğer herhangi bir kusur bulunursa, müşteriye bilgi verilmeli ve montaj öncesi bu kusurlar giderilmelidir.

Duvarı, duvar yapısını, yapının taşıma kapasitesini, sızdırmazlık için silikon çekilecek kenarların yapışkanlık özellikleri düzgünlüğü, bina nemini, yük transferi ve montaj için olanakları, yapısal toleransları ve yükseklik referans noktalarını kontrol edin.

Sözleşmelere, sağlanan montaj ayrıntılarına, planlama yönergelerine, ısı korumasına, nem korumasına ve diğer kısımlarla olan etkileşimleri kontrol edin.

Sabitlenme malzemeleri tedarik kapsamının bir parçası değildir. Montajcı, mevcut alt yapıyı değerlendirdikten sonra hangi sabitleme malzemelerinin kullanılacağına karar vermelidir. Montajcı, sabitleme malzemelerinin ilgili alt yapı için uygun olduğunu ve montajın doğru bir şekilde tamamlandığını sağlamalıdır.

Before starting the assembly, the site conditions must be checked. Apparent defects and deficiencies in the structural opening where the product will be installed should be inspected. If any defects are found, the customer should be informed, and these defects should be rectified prior to the installation.

Check the wall, wall construction, load-bearing capacity of the structure, adhesive properties of the edges for silicone sealing, evenness, building moisture, possibilities for load transfer and installation, structural tolerances, and height reference points.

Verify compliance with contracts, provided assembly details, planning guidelines, heat protection, humidity protection, and interactions with other components.

The fixing materials are not included in the scope of supply. The installer must determine which fixing materials to use after evaluating the existing substructure. The installer must ensure that the fixing materials are suitable for the respective substructure and that the assembly is completed correctly.

**TESLİMAT***Handover*

Kullanıcıya bilgilendirme yapılırken, tüm işletme, montaj ve ayarlama talimatları ile bakım ve temizlik yönergelerinin kullanıcıya teslim edilmesi gerekmektedir. Sağlanan ürünün fonksiyonu konusunda kullanıcıya eğitim vermek ve güvenlik ve kullanım talimatlarını sağlamak önemlidir. Talimatlara uyulmaması veya yanlış işletme, zararlara ve kazalara neden olabilir. Müşteri, talimatları dikkatlice saklamalı ve satış durumunda yeni sahibine teslim etmelidir.

During the handover to the user after installation, all operating, assembly, and adjustment instructions, as well as maintenance and cleaning guidelines, must be provided. It is important to educate the user about the functionality of the supplied product and provide instructions on safety and usage. Failure to follow the instructions or incorrect operation may result in damages and accidents. The customer must keep the instructions carefully and hand them over to the new owner in the event of a sale

**ÖNERİLEN ARAÇLAR***Recommended Tools*

- Yapısal açıklığa uygun sabitleme malzemeleri
- Çerçeve destek malzemeleri
- Camlama destek malzemeleri
- Kauçuk veya plastik çekiç
- Matkap uçları seti
- Matkap/ Darbeli matkap
- Uzun su terazisi
- Yıldız tornavida
- Su terazisi ve ya lazer
- Eldivenler
- Cam vantuzları
- Nötr silikon
- Bir veya iki bileşenli poliüretan yapıştırıcı
- Yüksek kaliteli, nötr, elastik tek bileşenli derz dolgu malzemesi
- Maket bıçağı
- Silikon ve silinon tabancası
- Açı ölçer
- 4 adet sehpa

- Appropriate fixings for the structural opening*
- Frame support materials*
- Glazing support materials*
- Rubber or plastic mallet*
- Set of drill bits*
- Drill/Impact drill*
- Long spirit level*
- Phillips screwdriver*
- Spirit level or laser level*
- Gloves*
- Glass suction cups*
- Neutral silicone*
- One or two part polyurethane assemble adhesive*
- A high quality, neutral, elastic one component joint sealant*
- Utility knife*
- Silicone and gun*
- Set square*
- Trestles x 4*

MONTAJ YERİ İNCELEMESİ

Site Survey

İLK DENETLEME

Opening Inspection

- Montaj yapılacak yapı boşluğu, düzgün yüzey, düzgün zemin, şakülünde ve dikdörtgen olacak şekilde olmalıdır.
 - Montaj yapıldığında, yükler çerçevenin herhangi bir bölümüne aktarılmamalıdır.
 - Yapı boşluğunun temiz olduğundan emin olun.
 - İç ve dış açıklık ölçüleri kontrol edilmeli ve herhangi bir farklılık varsa belirlenmeli, katlanacak kapılar için yeterli açıklığın sağlanması ve alçı, seramik veya benzeri malzemelerle engellenmemesi için gerekli önlemler alınmalıdır.
 - Açıklığın yüksekliğini, genişliğini ve diyagonalleri kontrol ederek, açıklığın herbir tarafında eşit ve dikdörtgen olduğundan emin olun.
 - Genellikle üç ölçüm yapılmalıdır.
 - Yüksekliği ve genişliği doğrulamak için metre kullanılmalıdır.
 - En küçük yükseklik ve genişlik ölçümü imalat ölçüsünü belirleyecektir.
 - Diyagonalleri ölçerek dikdörtgen olduğunu doğrulayın.
-
- The structural opening where the installation will take place must have a smooth surface, level floor, plump and rectangular.
 - When the installation is completed, the loads must not be transferred to any part of the frame.
 - Ensure that the structural opening is clean.
 - The internal and external reveal sizes should be checked and any variations must be determined to ensure enough opening light for the area where doors will fold and will not be obstructed by plaster, tiles or etc.
 - Check the aperture's height, width and diagonals to ensure the opening is equal on all sides and rectangular.
 - Generally three measurements should be taken.
 - Use tape measure to verify the aperture overall height and width.
 - Smallest height and width measurement will determine the overall frame manufacturing size.
 - By measuring the diagonals verify the aperture is square.

MONTAJ YERİ İNCELEMESİ

Site Survey

REFERANS ÇİZGİSİ

Datum Line

-Lazer ile bir referans çizgisi oluşturulmalıdır. Üst ve alt ölçümlerin hepsi tek tip olmalıdır. Katlanır kapı kasasının düzgün bir yüzeye oturması önemlidir.

-A Datum Line must be created with the laser. The top and bottom measurements should all be uniform. It is important that the folding door frame sits on a smooth surface.

-Dikey olarak lazer ile belirlenecek bir referans çizgisi, yan çerçevenin gönyede olmasını sağlayacaktır. Sol ve sağ ölçümlerin hepsi tek tip olmalıdır. Katlanır kapı kasasının düzgün bir yüzeye oturması önemlidir.

-A vertical laser reference line will ensure that the side frame is square.. The left and right measurements should all be uniform. It is important that the folding door frame sits on a smooth surface.

KASA MONTAJI*Frame assembly*

-Tüm dış çerçeve bağlantı birleşim yerlerine ve çerçeve bileşenlerinin arasına poliüretan montaj yapıştırıcısı sürün

-Apply polyurethane assembly adhesive at all outer frame connection joints and between the frame components.

-Kasa köşelerini köşe takozlar kullanarak bağlayın ve köşe pres makinesi yardımı ile presleyin.

-Connect the corners of the frame using corner cleats and press them with the help of a corner press machine.

KASA MONTAJI*Frame assembly*

-Tüm dış çerçeve bağlantı noktalarında ve çerçeve bileşenleri arasında poliüretan montaj yapıştırıcısı uygulayın.

-Apply polyurethane assembly adhesive at all outer frame connection joints and between the frame components.

Not: Köşe presleme yapmadan önce menteşe bağlantı parçalarını mutlaka kasa içine yerleştiriniz.

Note: Before connect the corners, be sure to place the hinge connecting parts inside the frame.

KASA MONTAJI*Frame assembly*

-Hazırlanan yapısal açıklığa çerçeveyi yerleştirin ve gerekli olduğunda paketleyerek çerçevenin açıklık içinde terazisinde ve gönyeli olarak tutulmasını sağlayın.

-Insert the frame into prepared structural opening and pack as necessary to ensure that the frame is held plumb and square inside the opening.

KASA MONTAJI*Frame assembly*

-Uygun sabitleme vidaları ve tapaları kullanarak çerçeveyi sabitleyin.

A= Vida mesafesi köşeden yaklaşık 150 mm uzaklıktadır.

B= Vidalar arası maksimum 500 mm olmalıdır.

-Secure frame using suitable fixing screws and plugs.

A=Anchor distance from corner of frame approximately 150mm.

B= Anchor spacing generally at maximum 500 mm.

KAPI KANAT MONTAJI*Door Vent Installation***ÖNERİLER**

- Herhangi bir kapı paneli takmadan önce tüm bileşenleri kontrol edin. Eksik bileşen olmadığından emin olun.
- İç tarafı belirlemek için panel cam çıtalarına bakın.
- Alt tarafı belirlemek için panel drenaj deliklerine bakın.
- Tüm paneller numaralandırılmalıdır ve fabrika çizimine göre monte edilmelidir.

RECOMMENDATIONS

- Before installing any door panels check for all the components. Make sure there is no missing components.
- Look for the panel glass beads to determine the interior side.
- Look for the panel drainage holes to determine the bottom side.
- All panels are numbered and must be installed with accordance to the factory drawing.

1.KAPI MONTAJI*Door#1 Installation*

- Kapı No.1'in menteşe olan tarafını çerçeveye yaklaştırmak ve çerçeve üzerindeki menteşe bağlantı parçaları ile aynı hizaya getirmek.
- Kapı üzerindeki menteşeyi, menteşe bağlantı parçasının üzerine yerleştirmek ve Menteşeyi M5x12mm Makine vidası kullanarak sabitlemek.

- Move the hinge side of Door No. 1 closer to the frame and align it with the hinge connection parts on the frame.
- Place the hinge on the door over the hinge connection part and fix the hinge using M5x12mm Machine screw.

2.KAPI MONTAJI*Door#2 Installation*

- Kapı No.1'in montajından sonra, Kapı No.2 alınır ve Kanat No.1' in yanına getirilir.
- Menteşe ve menteşe bağlantı parçaları aynı hizaya getirilir ve sabitlenir.

- After the assembly of Door No. 1, Door No. 2 is taken and brought next to Door No. 1.*
- The hinge and hinge connection parts are aligned and fixed.*

- Kapı No.2'in montajından sonra, alt araba, üst araba ve menteşe montajı yapılır.

- After the assembly of Door No. 2, the lower trolley, the upper trolley and the hinge are assembled.*

3.KAPI MONTAJI*Door#3 Installation*

- Kapı No.2'in montajından sonra, Kapı No.3 alınır ve Kanat No.2 in yanına getirilir.
- Menteşe ve menteşe bağlantı parçaları aynı hizaya getirilir ve sabitlenir.

- After the assembly of Door No.2, Door No.3 is taken and brought next to Door No.2.*
- The hinge and hinge connection parts are aligned and fixed.*

- Kapı No.3'in montajından sonra, bütün kapılar kapatılır ve kontrol yapılır.

- After the assembly of Door No.3, all doors are closed and checked all system.*

CAM MONTAJI*Glass Installation*

Not: Tüm camlar TS EN 1279 standartları gerekliliklerine uygun olmalıdır. Ayrıca cam imalatçıları tarafından verilen talimatlar takip edilmelidir.

NOTE: All glazing should conform in the requirements of TS EN 1279. In addition any instructions given by glass manufacturers should be followed.

- Isıcam montajları yapılmadan tüm kapıları kilitleyin ve tam olarak yerine oturtun.
- Kapı No.1' den başlayarak cam çıtalarını çıkarın.
- Cam takozlarını yerleştirin ve ısıcamı yerine yerleştirin. Isıcam ayarını yaptıktan sonra cam çıtalarını takın.
- Bütün kapılar için işlemleri tekrar edin.
- Kapıların çalışıp çalışmadığını kontrol edin ve gerekirse işlemleri tekrarlayın.

- Before glazing, lock all doors panels and fully engage the locks.*
- Remove the glass peads from Door No.1*
- Place the glass support parts and install the glass. After glazing, install the glass beads.*
- Repeat the process for all doors.*
- Check for door running operation and adjust if necessary.*

FDT80 - 1,8mm

CAM MONTAJI

Glass Installation

:CAM TAKOZU
GLASS SUPPORT

CAM MONTAJI*Glass Installation*

- :CAM TAKOZU
GLASS SUPPORT
- :DESTEK NOKTALARI
SUPPORT POINT

Not: Destek noktalarında cam ve kanat profilinin beraber çalışmasını sağlayacak, Hibrit Mastik (Shore A 40) kullanılması önerilmektedir.

NOTE: It is recommended to use Hybrid Mastik (Shore A 40) at support points to ensure the cooperative functioning of the glass and vent profiles.

**SON DOKUNUŞLAR***Finishing Touches*

- Kolların ve kilitleme mekanizmalarının her kapıda sorunsuz çalıştığını kontrol edin.
- İkiye katlama işleminin düzgün ve serbest çalıştığını kontrol edin.
- Kilitlerin kapalıyken düzgün çalışıp çalışmadığını kontrol edin.
- Menteşeleri kontrol edin ve eksik vida olmadığından emin olun.
- Hava sızdırmazlığını kontrol edin ve kapıların tamamen sızdırmaz olduğundan emin olun.
- Çevreyi kontrol edin ve kapı ünitesinin hava geçirmez olduğundan emin olun.
- Alt rayı temizleyin ve herhangi bir kalıntı içermediğinden emin olun.
- Ev sahibine talimat verildiğinden ve ikiye katlanır kapıların nasıl kullanılacağını ve nasıl bakılacağını tam olarak bildiğinden emin olun.

- Check that the handles and locking mechanisms operate smoothly on each door.*
- Check the bi-fold action is smooth and free running.*
- Check that the locks operate correctly when closed.*
- Check the hinges and ensure that there are no screws missing.*
- Check the weather seal and ensure that the doors are fully sealed.*
- Check the perimeter and ensure that the door unit is weather tight.*
- Clean the bottom track and ensure it is free of any debris.*
- Ensure that the homeowner is instructed and knows exactly how to use and look after bi-fold doors.*

The image contains two technical cross-section drawings of a window frame, labeled (2a) and (2b). Drawing (2a) shows the top half of the frame with dimensions SH (total height) and GH (height from the top rail to the bottom rail). It includes callouts for various components: (2) for the top rail, (3) for the side rail, (8) for the bottom rail, and (11) for the bottom rail. Drawing (2b) shows the bottom half of the frame with dimensions SH (total height) and GH (height from the top rail to the bottom rail). It includes callouts for various components: (8) for the bottom rail, (3) for the side rail, (11) for the bottom rail, and (2a) for the bottom rail. The drawings also show the internal structure of the frame, including the sash and the bottom rail.
